FREQUENCY REPORT
Number of Surveys (n) = 574 Web Surveys

A note about the use of sex and gender in this report:

Survey responses are reported by sex based on the responses to questions 46, 47, and 48. For the purpose of the ACHA-NFSHA report documents, respondents are reported as male or female only when their responses to these three questions are consistent with one another. If faculty and staff gender identity is consistent with their sex at birth AND the faculty and staff selects "no" for transgender, then respondents are designated as either male or female. If a respondent selects "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as non-binary. A respondent that skips any of these three questions is designated as unknown. Only 3 of the 4 categories are displayed in this report. Faculty and staff categorized as non-binary are included in the Total column, but are not presented in a separate column. When the Total of any given row is higher than the sum of the male, female, and unknown faculty and staff, the difference can be attributed to non-binary faculty and staff that selected the response option presented in that row.
